Objective

Data Analyst with expertise in Python, SQL, and data visualization. Proficient in statistical analysis, ETL processes, and machine learning techniques. Passionate about leveraging data-driven insights to solve complex business problems and drive strategic decision-making.

Education

MCA (Master of Computer Applications)

Aurora PG College

2021 – 2023

Uppal, Hyderabad, Telangana

B.Sc. (Computer Science)

Government Degree College

2018 – 2021

Siddipet, Telangana

Experience

Falcon AVL

Backend Developer

05/2023 – 11/2023

Hyderabad, Telangana

- Designed and managed databases using PostgreSQL and MySQL.
- Developed RESTful APIs using Django and DRF to support data analysis applications.
- Optimized SQL queries for improved performance and data retrieval efficiency.

Technical Skills

Programming Languages: Python, SQL

Databases: PostgreSQL, MySQL

Data Analysis: Pandas, Numpy, Matplotlib, Seaborn, Statistical Analysis

Machine Learning: Scikit-learn, TensorFlow, OpenAI, NLP, Transformers

Visualization: Power BI, Tableau

Cloud Platforms: AWS, Azure

Tools: Git, VS Code, Docker, Jira

Projects

Helpdesk Ticketing System

Django, Python, PostgreSQL

Jun 2023 - Oct 2023

Hyderabad, Telangana

- Built a ticketing system with analytics on response times and issue resolution.
- Created reports using SQL queries and visualized data with Matplotlib.

TeaTime Application

Kotlin, XML, Firebase

Nov 2022-Mar 2023

Hyderabad, Telangana

- Developed TeaTime, an Android application to monitor stall profits and manage orders.
- Implemented a database system for seamless data storage and retrieval related to ordering and delivery.
- Designed a user-friendly interface for stall staff to place and track orders.
- Monitored and debugged the application to ensure optimal performance.
